

Dean Sanghyuk Seo

A self-learning laid-back team player with intuition who can quickly grasp complex systems and complete tasks under minimal guidance

SUMMARY OF SKILLS

- Understanding C++ templates such as SFINAE, value categories, and concepts.
- Being aware of subtle memory reordering issues with atomic operations.
- Writing code for both Linux, Mac, and Windows.
- Debugging programs with LLDB/GDB in Linux comfortably.
- Troubleshooting ABI issues and symbol visibility problems.
- Experienced the ef_vi APIs to use 7000x and 8000x Solarflare cards.
- Setting the CI/CD environment by utilizing containerization with Podman/Docker.
- Proficiency in Git by knowing what cherry-pick and fast-forwarded merges do.
- Using advanced features in Confluence to publish well-formed documents.
- Enjoying helping DevOps-y tasks with SaltStack, GitLab CI/CD, and Elasticsearch.

WORK EXPERIENCE

Squarepoint Capital, Singapore — Software Engineer

2022.07 ~ Current

- Developed on latency-critical applications for international securities exchanges
- Onboarding Chinese derivative markets in Hong Kong and China

Ingensoma, Singapore — Software Engineer

2018.12 ~ 2022.03

- Worked on packet capture infrastructure with Metamako and FMADIO
- Wrote trading platform for KOSPI200 Options against Eurex T7 and CME
- Helped DevOps's automation for scaling out VM instances with SaltStack

Samsung Electronics, Seoul, South Korea — Contractor

2018.08 ~ 2018.11

- Developed semiconductor control applications using Qt/C++ in Linux

Agoda, Bangkok, Thailand — Software Engineer

2017.03 - 2018.06

- Created and distributed Docker images of our apps in Windows
- Implemented and deployed common class libraries in .NET through Teamcity

QMC, Anyang, South Korea — Software Engineer

2015.04 - 2016.09

- Developed laser controller applications in C++11/14
- Wrote sequence scripts in Lua, using an open-source project, [Sol v2](#).

Snowpipe, Seoul, South Korea — Server Programmer

2014.11 - 2015.02

- Built mobile game's asynchronous servers as a contractor

Winforsys, Yongin, South Korea — Software Engineer

2011.10 - 2014.07

- Implemented controller applications on MFC and COM libraries for P/Invoke
